

## About Safestep .

SafeStep: is a trustful system which helps users to save proofs securely. Our system helps users as soon as we get a signal from them. All your emergency data is stored safely and accessible only to trusted contacts when you need help.

Founder: Azimova Sarvinoz

Location: Uzbekistan

Platform: Mobile app/ Telegram bot

Telegram bot: @SafeStepAssistantbot

Mobile app: <https://safestep-site.vercel.app/>

Slogan: Safety iN every step

## Problem

When you feel unsafe, who do you call when you cant even talk

According to statistics

1 in 3 women globally face physical or sexual violence (UN Women, 2023).

In Uzbekistan, safety-related incidents have increased by 27% in the past 2 years (Stat.uz).

There is no fast, discreet, and localized emergency alert system.

Most current solutions require downloading apps, which is a barrier.

## Our Solution SafeStep

Instant digital alert through Google Form.

Connected to Telegram bot for real-time notification.

Sends user data + location to trusted contact.

No installation needed works in any browser.

Easy to customize and scale for schools, dorms, public places.

## Market Gap & Why SafeStep is Unique

No such product exists in Uzbekistan or Central Asia.

Global apps (like bSafe or Noonlight) are:

- Not localized
- Require installation or subscription
- Not connected to local platforms like Telegram

SafeStep is:

Telegram based

No app needed

Customizable

Fast and free to use

Feature Comparison

How SafeStep outperforms other apps in usability and localization.

SafeStep contributes to:

- SDG 5: Gender Equality
- SDG 16: Peace, Justice and Strong Institutions

Promotes safety among youth and women in digital spaces.

Enables authorities and schools to respond faster to threats.

Social Impact & SDGs

## Traction & Use Cases

Pilot tested in local schools and public awareness campaigns.

Can be placed via QR codes in:

- Schools
- Universities
- Dormitories
- Parks
- Public transport stops

## Next Steps for Growth

Partner with schools, NGOs, and safety organizations.

Launch national awareness campaign (online + offline).

Add AI alert detection, offline QR triggers, and mobile interface.

Seek seed funding to scale across Central Asia.
